

BATHING BEAUTY

Give your bathroom haven the upgrade it deserves with BelBagno's exquisite range of free-standing and back-to-wall bathtubs. The company boasts a vast range of acrylic bathtubs as well as a premium collection of resin stone baths, all thoughtfully designed and shaped with comfort in mind. Made from the highest-quality materials, BelBagno baths are designed to facilitate a therapeutic bathing experience.

All baths use premium sanitary-grade acrylic for superior gloss and scratch resistance, and are reinforced with fibreglass to ensure strength and durability. Their colour will not change or fade as they are stabilised to retain the sparkling white appearance. The baths have excellent thermal properties and back support, and also have a high weight capacity. BelBagno's double-ended bath, which is designed to allow two people to enjoy the bath comfortably, is currently one of its most popular products.

Every BelBagno bath is manufactured to Australian Standards, so you can be assured products are safe and reliable. Boasting decades of experience, the team are experts in acrylic and resin stone bath technology. All baths are backed with long-term warranties for peace of mind. Additionally, customers don't need to worry about purchasing any external drains or overflows in addition to their BelBagno bath as they are all included with their purchase.

With BelBagno bathtubs, you can enhance the aesthetic appearance of the bathroom without blowing your budget. Treat yourself to your most relaxing and comfortable soak yet, thanks to BelBagno.
